Enterra Expands Washington Operations Center
Growing Government Practice Leads to Increased Federal City Presence

YARDLEY, Pa. and RESTON, Va. (March 28, 2007) – Enterra Solutions, LLC, announced today the relocation and expansion of its Washington Operations Center (WOC). This expansion more than doubles the size of the WOC’s personnel and infrastructure and is the direct result of Enterra’s growing Global Enterprise Resilience Management business. The new WOC will be located on 11955 Freedom Drive in Reston, Va. and is anticipated to support a team of more than 100 Enterra employees by the end of 2007.

“As our Global Resilience work expands, it requires a much larger presence here in the Washington region,” said Stephen DeAngelis, President and CEO of Enterra. “Whether in the national security infrastructure, energy, transportation or other relevant critical infrastructure industries, our work uniquely bridges the commercial and government sectors. Now, we’ll have a significant presence in Reston, Va. from which to grow our business. This is the perfect location to secure our place in the market.”

Enterra’s Washington presence reflects the growing marketplace for making entities in both the government and commercial sectors systemically resilient to the challenges and opportunities of a rapidly changing global environment. According to a market analysis by research firm Frost & Sullivan, the market for Enterprise Resilience Management solutions is forecast to see double-digit growth over the next five years to more than \$140 billion. Enterra’s establishment of deep roots in the Washington area is a sign that the market has accepted the company as a leader in resilient technology solutions.

“Washington is a natural home for promoting Enterra’s Enterprise Resilience Management Solution due to its proximity to major policy decision makers on Capitol Hill, governmental agencies and transnational organizations with which we work, along with our strategic technology and systems integration partners. Additionally, the Washington metropolitan area has a large and deep talent pool from which we can draw new employees, and a large and growing market of emerging technology companies for us to partner with as we rapidly scale our business,” said DeAngelis.

Enterra’s Enterprise Resilience Management Solution (ERMS™) is distinctively equipped to address the security, compliance and competitive challenges faced by companies in critical infrastructure companies and governmental agencies. By translating business logic and best practices into parameter-driven algorithms and software code, ERMS creates a predictive, responsive and adaptive system that ultimately enables leading businesses and governments to thrive in globalizing and consolidating industries. In a world of dynamic threats to critical infrastructure, increased regulations and globalizing and consolidating industries, real-time decision making capability has the ability to exploit business opportunities, save dollars and protect essential personnel.

About Enterra Solutions

Enterra Solutions, at www.enterrasolutions.com, is the leader in Enterprise Resilience Management™ – a new enterprise architecture that enables public- and private-sector organizations to respond to the stressors that result from globalization, rapid technological change, terrorism, natural disasters, and other

21st century challenges. Enterra's proprietary Enterprise Resilience Management Solution™ (ERMS™) consists of a best-practices methodology and technology solution that automates rules sets and integrates security, compliance and business process optimization into a single function, and provides a platform that transforms the organization into a Resilient Enterprise™.
