Enterra Solutions Wins Department of Homeland Security Contract

RESTON, Va. (June 9, 2008) – Enterra Solutions announced today that it has been awarded a contract to support a Department of Homeland Security-mandated study to develop a long-range security strategic and continuity of operations plan for the U.S. Coast Guard’s Sector Delaware Bay. All future federal port-security grant awards for this Area of Responsibility (AOR) will be based on this plan’s recommendations.

The study is being conducted by TetraTech, a Houston-based consulting, engineering, and technical services company. Under the terms of the contract, Enterra Solutions’ consultants Andrew Bertolazzi and Andre Stephano will serve as the primary liaison personnel between TetraTech and the Area Maritime Security Committee, the fiduciary agent and manager of this project.

“This contract strengthens our company’s port security portfolio,” stated Stephen DeAngelis, president and CEO of Enterra Solutions. “We look forward to helping make the Delaware Bay a more secure AOR.”

About Enterra Solutions

Enterra Solutions (www.enterrasolutions.com) is the global leader in applying Advanced Enterprise Management Systems™ to help public and private sector clients transform into resilient organizations that proactively mitigate strategic risk, further competitive advantage and optimize enterprise performance. Through its proprietary Enterprise Resilience Platform™, Enterra uniquely combines strategic consulting, industry best practices and standards-based technology to create Advanced Enterprise Management Systems that automate security, compliance and performance rule sets into highly effective and holistic business processes. These next-generation Advanced Enterprise Management Systems are delivered as subscription-based, solution-as-a-service offerings that are constantly updated to address changing market dynamics, enabling clients to achieve predictable and sustainable growth.
