FOR IMMEDIATE RELEASE

**Enterra Solutions and Sim-G Technologies Partnering
To Help Build Business Infrastructure in Iraq**

RESTON, Va. (November 29, 2007) – Enterra Solutions, LLC, and Sim-G Technologies, LLC (Sim-G) announced that the two firms are partnering to provide the expertise needed to support and improve business processes necessary for economic development in Iraq.

Under a contract signed between Sim-G and the U.S. Department of Defense's Business Transformation Agency (BTA) and its Task Force to Improve Business and Stability Operations in Iraq, Enterra Solutions is taking the lead to provide a business-to-business (B2B) trading exchange service to help stimulate the Iraqi economy. The Iraq B2B trading exchange will provide services to assist Iraq companies with selling their products world-wide and will be a model for subsequent Enterra Solutions' economic development activities in emerging market countries in the Middle East, Central Asia, and Africa.

Using an online B2B trading exchange, the team will implement Enterra Solutions' Enterprise Resilience Management Solution™ to support improved commercial transaction processing and supply chain logistic services. Enterra Solutions' supply chain advisory services will introduce the strategic and operational training, product development and merchandising, and consulting necessary to rapidly engage international commerce. Enterra Solutions will also provide an Iraqi Products Portal offering secure credit card and vendor services. These core capabilities will aid Iraqi manufacturers and other industry sectors to boost sales for Iraqi goods and drive foreign direct investment in Iraq.

“This is the first of a number of business development activities that Enterra Solutions will be implementing in Iraq to help stimulate its economy,” said Stephen F. DeAngelis, president and chief executive officer of Enterra Solutions. “The B2B and B2C trading exchanges will provide much needed services to emerging Iraqi companies and other U.S. and international entities interested in making investments in Iraq. The electronic commerce and supply chain services that Enterra Solutions and our partners will be providing in Iraq are the precursors to our Development-in-a-Box™ Solution deployment in Iraq and other Middle Eastern, Central Asian and African nations.”

The B2B project involves the initial implementation of Enterra Solutions' Development-in-a-Box™ solution. Development-in-a-Box™ helps create critical infrastructure by embedding best practices and international standards into automated businesses processes that are essential to fostering collaboration between government agencies and private sector industries. Enterra Solutions has established several strategic partnerships that will help ensure business activity in Iraq and connect them to the global economy.

Enterra Solutions has established a new office in Erbil and will work with local entrepreneurs and manufacturers to create electronic systems that link Iraqi factories to investors and consumers. Business-to-consumer (B2C) services are anticipated to be added in the future.

About Enterra Solutions

Enterra Solutions, at www.enterrasolutions.com, is the leader in Enterprise Resilience Management™ – a new enterprise architecture that enables public- and private-sector organizations to respond to the stressors that result from globalization, rapid technological change, terrorism, natural disasters, and other 21st century challenges. Enterra Solutions' proprietary Enterprise Resilience Management Solution™ (ERMS™) consists of a best-practices methodology and technology solution that automates rules sets and integrates security, compliance and business process optimization into a single function, and provides a platform that transforms the organization into a Resilient Enterprise™. Enterra Solutions focuses on four product areas: Pre-configured industry solutions, Development-in-a-Box™, ResilienceNet Fusion Centers™ and information sharing solutions.
